

Recycling is important

The right waste management is important in order to keep the environment save. In the district of Ísafjarðarbær, the waste is collected via a 2-bin-system. One bin is for domestic waste while the other one is for recycling material like paper, cardboard, plastic and metal.

In Ísafjörður, the collection centre for all waste is located at Funi in Engidalur. All waste can be brought there. Recyclable waste disposal is free as well as the disposal of toxic waste and appliances.

People from Suðureyri, Flateyri and Þingeyri are serviced by a special truck that collects the waste that is not collected through the regular waste collection at home. During summer the truck service is 3 times a week and during winter 2 times a week. Times and dates are advertised at www.kubbur.is and www.isafjordur.is

Please keep in mind that garbage bins can be left behind if they are inaccessible due to snow or if the sorting is improper.

Recycling bin

The main bin

All recycling material is supposed to go loose in the bin

- Paper, newspaper, office paper
- Cardboard all sorts, clean.
- All cardboard packaging from milk, orange juice and similar.

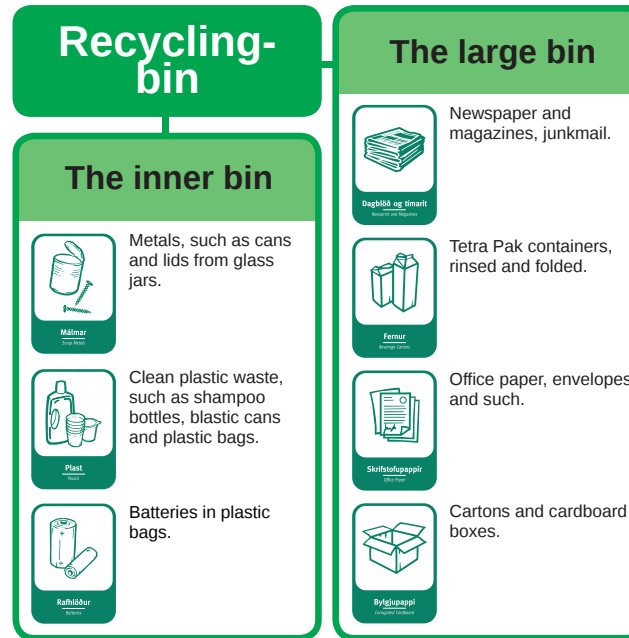

The inner bin

- Metals: like cans, jar lids
- All plastic packing's, wrapping, bags and styro-foam trays from food.
- Batteries are supposed to go in a plastic bag in the inner bin.

Domestic waste

The bin for domestic waste contains all garbage from homes that is not recycled. Diapers, food waste, vacuum cleaner bags, glass jars and non-recyclable packing is collected in the bin for domestic waste. For an easy garbage collection, it is important that the bins are located as close to the road as possible. During wintertime, it is important that the bins aren't inaccessible due to snow. For any further information, please feel free to contact Kubbur ehf. By phone (456 4166), email (kubbur@kubbur.is) or through the Facebook page of the company.

Recycling

Waste that does not fit in the bin

The waste collection centre Funi in Engidal contains all the different recycling facilities and all possibilities for the right disposal of waste. Also hazardous waste like paint, oil, brake fluid and so on can be brought to Funi. Remember that it doesn't cost anything to bring hazardous waste, electronics, fridges and waste that goes to recycling. Flateyri, Þingeyri and Suðureyri are serviced by a special truck that collects all extra waste that is not collected by the regular garbage collection. The schedule is advertised on the internet: www.kubbur.is.

Toxic waste

Toxic waste can be brought to Funi or the special collection truck for free
